Allergen Guide / Guía de alérgenos

Allergen Disclaimer:

We provide the most current ingredient information available from our suppliers, including information for the nine most common allergens as identified by the U.S. FDA (eggs, milk, wheat, soy, peanuts, tree nuts, sesame, fish, and shellfish). We also explicitly identify items made with known gluten-containing ingredients so that our customers with food allergies can make informed food selections.

However, changes to manufacturing, temporary substitutions in the supply chain, customization, and cross-contact of ingredients and equipment may result in variations in the final product. Although an allergen may not be present in a specific item, the allergen may be present during production, distribution, or within our restaurants.

As such, **we cannot guarantee that any item in our restaurant is allergen-free**.

Sesame Alert! When an ingredient includes a "may contain" statement from the manufacturer or distributor, we do *not* identify these potential allergens. However, sesame is small, scatters easily, and is difficult to control in a baking environment. Therefore, should we come across a "may contain SESAME" or "SESAME is present in the facility" statement in one of our products, we will identify it as an allergen.

Due to the individualized nature of food allergies and food sensitivities, customers' healthcare providers may be best positioned to make recommendations for customers with food allergies and special dietary needs. If you have questions about our food, please contact us directly at www.iloveanthonys.com/connect. We also encourage customers to review this allergen guide before placing *every* order, as allergens in menu items may change. By proceeding with an order, you acknowledge your understanding of this information.

Descargo de responsabilidad sobre alérgenos:

Proporcionamos la información más actualizada sobre ingredientes disponible de nuestros proveedores, incluida información sobre los nueve alérgenos más comunes identificados por la FDA de EE. UU. (huevos, leche, trigo, soja, maní, nueces, sésamo, pescado y mariscos). También identificamos explícitamente artículos elaborados con ingredientes conocidos que contienen gluten para que nuestros clientes con alergias alimentarias puedan realizar selecciones de alimentos informadas.

Sin embargo, los cambios en la fabricación, las sustituciones temporales en la cadena de suministro, la personalización y el contacto cruzado de ingredientes y equipos pueden dar lugar a variaciones en el producto final. Aunque un alérgeno puede no estar presente en un artículo específico, el alérgeno puede estar presente durante la producción, distribución o dentro de nuestros restaurantes.

Como tal, no podemos garantizar que ningún artículo de nuestro restaurante esté libre de alérgenos.

¡Alerta Sésamo! Cuando un ingrediente incluye una declaración "puede contener" del fabricante o distribuidor, no identificamos estos alérgenos potenciales. Sin embargo, el sésamo es pequeño, se esparce fácilmente y es difícil de controlar en un entorno de horneado. Por lo tanto, si encontramos una declaración "puede contener SÉSAMO" o "SÉSAMO está presente en las instalaciones" en uno de nuestros productos, lo identificaremos como un alérgeno.

Debido a la naturaleza individualizada de las alergias y sensibilidades alimentarias, los proveedores de atención médica de los clientes pueden estar en la mejor posición para hacer recomendaciones para clientes con alergias alimentarias y necesidades dietéticas especiales. Si tiene preguntas sobre nuestra comida, contáctenos directamente en www.anthonyspizzaandpasta.com/connect. También recomendamos a los clientes que revisen esta guía de alérgenos antes de realizar cada pedido, ya que los alérgenos en los elementos del menú pueden cambiar. Al continuar con un pedido, usted reconoce que comprende esta información.
